

NCODE PRINT TEST

Check the print before running a batch. This sheet also tells you whether the app sees it as ONE page.

1 This line must be exactly 150 mm.

2 And this one 180 mm, give or take 2 mm.

Line 1 exactly 150 mm, line 2 between 178 and 182 mm?

Your print is to scale. Now write in the box and check the app.
Line 2 runs along the paper feed - being 1 % off there is normal.

Line 1 off, e.g. 146 mm - or both lines clearly short?

Your driver scaled the page. Turn off 'Fit to page', 'Shrink oversized pages' and 'Fit to printable area', set 100% / Actual Size.

Everything on one page in the app?

Then the app accepts this sheet. If it splits, it does not.

3 Write across this whole box
